Level 0 guidelines

As of 2 November 2020 (updated 10 November 2020)

LEVEL 0 OVERVIEW

Within Level 0 we would expect to see low incidence of the virus with isolated clusters, and low community transmission. Broadly, Level 0 and 1 are the closest we can get to normality, without a vaccine or effective treatment in place. Level 0 and 1 are designed to be sustainable for long periods.

Level 0 sees both youth and adult rugby continue up to modified contact training, with all formats of touch rugby also permitted. At this stage, unrestricted full contact training and matches are not permitted.
